

# SNAP

## CONCEALED CONNECTOR AND SPACER FOR TERRACES

- Versatile. It can be used both as a concealed connector for boards and as a spacer between boards and battens
- Developed to be self combined. By assembling two pieces, both functionalities are summed up for maximum efficiency and convenience
- Used as a spacer, it creates micro-ventilation under the boards and thus prevents water stagnation and ensures excellent patio durability
- PP (Polypropylene) material provides excellent durability at an affordable price
